# MAHMOUD ABOTALEB

Full-Stack Web Developer

Mit Ghamr, Dakahlia, Egypt | +20 1095021098 | mahmoudabotaleb960@gmail.com

Portfolio | LinkedIn | GitHub

*Open to junior roles in Egypt, Saudi Arabia, and remote*

## PROFESSIONAL SUMMARY

Junior full-stack web developer with a B.Sc. in Business Information Systems (2026) and three full-stack projects deployed live: a React and Laravel e-commerce store, a multi-branch ERP and point-of-sale system built with Laravel, and a B2B waste-trading marketplace built with React and PHP. Comfortable owning a feature from database schema to responsive UI. Looking for a junior full-stack role where I can keep growing on a real product team.

## TECHNICAL SKILLS

**Frontend:** React, Vite, Tailwind CSS, MUI, React Router, JavaScript (ES6+), HTML5, CSS3, Alpine.js, Responsive Design
**Backend:** PHP (OOP, PDO), Laravel, RESTful APIs, MySQL, Database Design & Migrations, Role-Based Access Control
**Tools:** Git, GitHub, Postman, VS Code, XAMPP, Deployment on IIS and Apache
**Concepts:** MVC, Component-Based Development, Context API

## PROJECTS

### TMSAAH SHOP: Full-Stack Luxury Fashion E-Commerce — 2026

Live demo | GitHub | *React 19, Laravel 12, MySQL, Sanctum, Tailwind CSS, Stripe, PayPal*

- Built a decoupled e-commerce platform: a React 19 SPA (Vite, Tailwind CSS) consuming a Laravel 12 REST API with MySQL and Sanctum authentication.
- Integrated Stripe and PayPal checkout (test mode, ready for live keys) and built an admin dashboard to manage products, categories, orders, and customers.
- Deployed publicly on a live server.

### WAZEN ERP: Multi-Branch POS & Inventory System — Solo project, 2026

Live demo | GitHub | *Laravel 12, PHP 8.2, MySQL, Tailwind CSS 4, Vite, Alpine.js, Spatie Permission*

- Built a cloud-based ERP and point-of-sale system for multi-branch retail, covering POS, inventory, customer credit, expenses, and profit & loss reporting.
- Designed a 29-table MySQL schema with migrations and seeders; implemented role-based access control (Admin, Branch Manager, Cashier) with Spatie Laravel Permission; deployed on IIS.
- POS: shift open/close with automatic cash shortage and overage calculation, barcode search, cash/card/credit payments, discounts, held invoices, and thermal (80mm) and A4 invoice printing.
- Inventory: multi-branch stock matrix, stock adjustments, inter-branch transfers, and stock valuation, plus a live dashboard.

### EHYAA: B2B Industrial Waste Trading Platform — Graduation project, 2026

Live demo | GitHub | *React 19, Vite, Tailwind CSS 4, MUI, PHP, MySQL*

- Team project (12 students); I built the entire application myself, from the database to the user interface.
- Built a circular-economy marketplace connecting industrial waste suppliers with recycling factories: listings, search and filtering by governorate and material, cart and checkout, order tracking, shipment dispatch, and supplier ratings.
- Frontend: React 19 SPA with React Router v7, role-based protected routes for Suppliers and Importers, and Context API for state.
- Backend: REST API in PHP (OOP, PDO prepared statements) on a normalized MySQL schema with foreign keys; deployed to production hosting.

## TRAINING

### Bravo Programming: Web Development Course & Practical Training — Jul 2025 – Jul 2026

- Completed a full web development course: HTML5, CSS3, JavaScript, PHP, MySQL, React, and Laravel (Jul 2025 – May 2026).
- Two-month hands-on training in building web applications with PHP Laravel (May 2026 – Jul 2026).

### FAD Software Development Community: Frontend & Backend Tracks — Aug 2026 – Sep 2026

- Completed the frontend and backend development tracks and received two certificates of completion.

## EDUCATION & LANGUAGES

### B.Sc. in Business Information Systems (BIS) — 2026

Misr Higher Institute for Engineering and Technology (MET), Egypt

**Languages:** Arabic (native), English (professional working proficiency)
